Objectives

- ▶ FIFA 11+ was developed by an international group of experts (F-MARC) and aims to prevent football injuries.
 - ▶ Football injuries identified by F-MARC, such as ligament injuries to the ankle and knee as well as hamstring, quadriceps and groin strains.
 - ▶ It is a complete warm up program that requires no equipment other than a ball.
 - ▶ It can be done on the field with athletes wearing their usual equipment including boots.

Essentials

▶ 3 sections

1. 8 minute running session and should be performed in all training sessions and matches (6 exercises)
2. 10 minute strength, plyometric and neuromuscular training (balance and coordination). There are 6 exercises that have 3 progression levels that will increase the degree of difficulty and provide variation to the program.
3. 2 minute intensive running session (3 exercises) provides athletes with final warm up and preparation for the training session.

Essentials

- ▶ The second and third sections are only performed prior to training sessions not matches.
- ▶ During all exercises the focus should be on knee control and awareness, landing techniques and cutting and planting, all factors known to be important in preventing ankle and knee injuries.
- ▶ After short period of familiarization the FIFA 11+ can be completed in 20 minutes and will replace the ordinary warm up program a team would typically use.

Repeat for each pair of cones. Remember to stay on your toes and keep your centre of gravity low by bending your hips and knees. **2 sets.**

2 RUNNING HIP OUT

Walk or jog easily, stopping at each pair of cones to lift your knee and **rotate your hip outwards**. Alternate between left and right legs at successive cones. **2 sets.**

Make it a full jump and synchronize your timing with your team mate as you jump and land. **2 sets.**
